## Brand DNA — what makes them different

### Farm-to-cup transparency

Every bag names the exact estate. Farmers listed on packaging. 80+ partner farms across Karnataka, Tamil Nadu & more.

### Freshness as the core promise

Roasted-to-order. Metro deliveries within 24 hours. No stale beans on shelves.

### Education-first community

Brewing guides, flavour wheels, barista training, coffee events. Built to convert tea drinkers into specialty coffee fans.

### Premium but accessible pricing

25–30% cheaper than Starbucks. Positioned as the "best value" in the specialty segment.

TRY10 first-purchase discount.

## Target audience

Urban millennials 25–45  
Work-from-home professionals  
Coffee curious beginners  
Home brewers & enthusiasts  
Premium gifters

## Key competitors

| Direct rivals                                                                                                 | Blue Tokai's edge                                                                                         |

## Key Strategic Takeaways

- D2C is currently 20% of revenue — high growth opportunity
- Subscriptions, app, and website are the levers to pull
- India's specialty coffee market growing at 10–15% annually
- Category tailwinds are strong — audiences are discovering coffee
- They already have content assets: farms, brewing guides, recipes
- Rich storytelling material for social and email marketing
- Subscription model offers up to 20% savings — strong hook
- Key lever for subscriber base growth and recurring revenue

## Brand brief

**The origin story is their biggest asset.** Blue Tokai was founded in 2013 with a simple mission—introduce customers to the estates they directly source from, roast with care, and make high-quality coffee accessible. The name itself is drawn from an old Malabari word for a peacock's tail. That story is emotionally rich and underused in digital marketing.

**They're at an inflection point financially.** Revenue has grown more than fivefold in four years — from ₹41 crore in FY21 to ₹216 crore in FY24 — and the company has revised its targets upward to ₹2,000 crore and 800+ stores within the next four years. This means your strategy needs to support aggressive growth, not just brand awareness.

**D2C is the underperforming channel.** Cafés drive 70% of revenue currently, with D2C at just 20%. The brand operates an internet-first model with coffee available on subscription—covering ready-to-drink, roasted and ground coffee, capsules, brew cans, mugs, and brewing equipment. Growing subscriptions online is the single biggest lever for the objective you've described.

**The competitive moat is education, not just product.** Despite having around 400 stores in India, Blue Tokai's products are 25–30% cheaper than Starbucks's—so price isn't the differentiator. What sets them apart is transparency, traceability, and community. Your content strategy should lean hard into that.

"The cup that turns you inward."

Campaign concept — Blue Tokai ×  
Self-discovery × Love redefined

**The insight—what I've identified**

**Blue Tokai's gap: no emotional identity**

Their content is product-first. Recipes, team shots, collabs. Beautiful — but cold. Coffee is deeply personal. They haven't claimed that territory.

### Angle 1 — Coffee as self-discovery

When someone moves from Nescafé to specialty coffee, something shifts. They start noticing flavour. They sit with themselves. That first quiet cup alone is often where a person starts being honest with who they are.

### Angle 2 — Coffee as love redefined

We chase romantic love. But the warmth we really need — the love that doesn't leave — is already there. In the friend who shows up. In the quiet morning. In your own company. Coffee already lives in those moments.

### Why this works for Blue Tokai specifically

Their farm-to-cup story is literally about knowing where things come from. Extend that idea inward — know where you come from. Know what you love. Same brand truth, human scale.

## Campaign name & tagline

*"Apna Wala Cup" — Your kind of cup*

*The cup that knows you. Before anyone else does.*

Works in Hindi and English. "Warm" and "ownable" speak to self-knowledge and belonging simultaneously. "Apna" means both "mine" and "one's own"—it carries the self-love angle naturally.

## Campaign pillars — 3 emotional territories

### Pillar 1

## **Solitude is not loneliness**

The beauty of a cup made just for you. Your morning ritual. The silence that feels full, not empty.

## **Pillar 2**

### **Platonic love is real love**

Two cups. Two people who just get each other. The friend you call. The chai wala replaced by a ritual you both share.

## **Pillar 3**

### **Discovering your taste = discovering yourself**

From instant to single-origin. A flavor you didn't know you loved. How knowing your coffee is knowing yourself.

# **Content ideas by pillar**

## **Pillar 1 — Solo rituals**

Instagram Reels: "5am. No one's awake. Just me and this cup." — cinematic, no voiceover, ambient sound

- Copy series: "You don't need company to enjoy good coffee. But good coffee makes your own company better."
- UGC prompt: "Share your solo cup moment" — #ApnaWalaCup
- Email: "A letter to you, from your 'morning'—narrative format, drives subscription CTA

## **Pillar 2 — Platonic love**

- Video series: Real conversations between friends over Blue Tokai — unscripted, documentary style. "Chai pe bulana" replaced by "Blue Tokai pe aaja."
- Copy: "The one who knows your order before you say it. That's love. That's your person."
- Valentine's week campaign: Gifting push — "This February, celebrate every kind of love." Gift boxes featuring two different beans, a card, brewing guide.
- Influencer brief: Ask creators to feature a platonic relationship, not romantic. Two best friends. A sibling. A mentor.

### **Pillar 3 — Taste as identity**

- "What's your flavour?" quiz on website → personalized bean recommendation → email capture for subscriber growth
- Reel series: "I used to think I liked dark roast. Turns out I like light roast. Turns out I like mornings." — coffee preference as self-revelation
- Blog: "The 5 stages of discovering your coffee taste (and what they say about you)"
- Subscription hook: "Your taste is still evolving. So is our selection." — monthly rotating single-origin subscription

## **3-month execution roadmap**

### **M1: Plant the idea—"Meet yourself."**

Theme: Solitude & self-discovery. Goal: Build emotional awareness, grow followers & email list.

- Launch #ApnaWalaCup UGC campaign with a seeded Reel — intimate, quiet, cinematic morning ritual
- Publish "What's your flavour?" quiz with email capture — targets Pillar 3
- 5-part Instagram carousel series: "Things coffee taught me about myself"
- Influencer brief: 4 micro-influencers (lifestyle/wellness, not food) — solo morning ritual content
- Email welcome sequence rewrite: emotional narrative, not just product push
- Meta ads: Awareness objective — "Before the world wakes up" visual — retarget with quiz

### **M2: Deepen the love—"The people around you"**

Theme: Platonic love. Goal: Drive gifting, subscriptions, D2C revenue. Valentine's angle.

- Valentine's week: "Celebrate all your loves" gifting campaign — curated two-person gift boxes
- Video series launch: 3 short documentary episodes — real friendships over coffee, no script

- Subscription push: "Two cups, one subscription" — pair plan with 15% off
- Influencer brief pivots to platonic — creators feature a best friend, not a partner
- Instagram Stories poll series: "Who's your Blue Tokai person?" — drives DMs and shares
- Retargeting: Quiz completers → personalized bean recommendations → first purchase offer TRY10

### **M3: Own the territory — "You've always known"**

Theme: Consolidation + community. Goal: Lock in subscribers, measure, amplify UGC.

- Compile the best #ApnaWalaCup UGC into a brand film — community as the hero
- Launch "Coffee + a conversation" event series at Blue Tokai cafés — platonic love, live
- Subscription loyalty nudge: "You've been waking up with us for 90 days. Here's something special." — loyalty offer
- Retarget all 3-month touchpoints: brand film as the closer — emotional payoff, subscribe CTA
- Blog SEO push: "How to start enjoying coffee" → organic discovery funnel
- Review and iterate based on Month 1 & 2 data — double down on top-performing pillar

## **Channel roles**

Instagram Reels + Carousels - **Primary**

Emotional storytelling, UGC amplification, reach

Email / Newsletter - **Primary**

Subscriber nurture, narrative depth, purchase conversion

Meta Ads - **Supporting**

Awareness to retargeting funnel, quiz traffic, D2C sales

Website / Quiz - **Supporting**

Email capture, personalization, subscription entry point

Micro-influencers - **Amplifier**

Authentic lifestyle seeding, UGC generation

Café events - **Offline**

Community, offline brand experience, retention

## Key success metrics

## My Insights:

**Why this campaign territory is winnable for Blue Tokai.** No Indian coffee brand owns the emotional/introspective space. Starbucks is an aspirational lifestyle. Third Wave Coffee is craft-enthusiastic. Blue Tokai has the farm story, the transparency, and the community roots—they're the only ones who can say, "We know where our coffee comes from." Do you know where *you're* coming from?" That's not a stretch. That's an extension of their existing brand truth.

**The platonic love angle is the most commercially potent.** It unlocks gifting revenue naturally, and it sidesteps the cliché of romantic coffee ads completely. Two friends sharing a cup is more shareable, more relatable, and more novel than a couple.

**The tone needs to stay warm and observational** — never preachy. The moment the copy says "Love yourself first!" it becomes a self-help brand, not a coffee brand. The best version of this keeps coffee at the center and lets the emotion arrive quietly, the way it actually does in real life—through a morning ritual, not a manifesto.

# SEO Strategy For Blue Tokai

Informational and educational keywords are exactly the right call for Blue Tokai — and here's the strategic logic behind it.

Blue Tokai's customer isn't searching "buy specialty coffee online" on day one. They're on a discovery journey. They start with questions—"Why does my coffee taste bitter?" "What is single-origin coffee?" "How to make good coffee at home." That's where Blue Tokai should meet them. Own the education layer, and the purchase follows naturally. It's also where their farm-to-cup story and expertise give them a genuine authority advantage over competitors who are purely retail-focused.

There's also a trust compounding effect—every informational article that ranks builds domain authority, which eventually lifts their commercial pages too. So you're not choosing education over revenue keywords; you're building the foundation that makes the revenue keywords rank later.

### **Strategic justification — why informational keywords work here**

Sleepy Owl ranks #2 for "coffee" in India by targeting 4,100+ educational queries — not by bidding on "buy coffee online." That's the blueprint.

#### Awareness

### **People discover coffee before they buy it**

Searches like "What is single-origin coffee?" or "Why does my coffee taste bitter?" are the real top of the funnel. These users are convertible—they just haven't been met yet. Blue Tokai's farm story gives them unmatched authority to answer these questions.

#### Authority

### **Education builds domain authority — which lifts commercial pages too**

Every ranking educational article earns backlinks from lifestyle and food publishers. That DA growth eventually helps product and subscription pages rank. You're not choosing education over revenue — you're building the foundation that makes revenue keywords rank later.

#### Conversion

### **Informational content converts — if you own the next step**

"How to make pour over coffee at home" → internal link to Blue Tokai's pour over beans → subscription CTA. The article is the funnel, not just awareness. Each guide must end with a natural product recommendation.

## **Keyword clusters—By intent & funnel stage**

### **Cluster 1 — Discovery / top of funnel (informational)**

High volume, low-to-medium competition. India-specific angles are underserved. Blue Tokai can dominate with depth and authority.

*what is specialty coffee*

*difference between arabica and robusta*

*what is single-origin coffee*

*coffee-growing regions in India*

*what does light roast coffee taste like*

*Chikmagalur coffee vs Coorg coffee*

*coffee tasting notes explained*

### **Cluster 2—Brewing education / mid-funnel (informational + commercial)**

High search intent. Users here are actively brewing or want to start. Directly bridges to equipment and bean recommendations.

*how to make pour-over coffee at home*

*french press coffee ratio*

*how to use moka pot*

*cold brew coffee at home India*

*AeroPress vs. pour-over*

*why does my coffee taste bitter*

*best grind size for french press*

*coffee-to-water ratio guide*

### **Cluster 3 — Consideration / commercial investigation**

Users evaluating options—warm audience. Converts faster. Competitor comparison articles and "best of" lists sit here.

*best coffee beans to buy in India*

*best specialty coffee brand India*

*coffee subscription India*

*freshly roasted coffee beans online India*

*best pour over coffee maker India*

*Blue Tokai vs Sleepy Owl*

### **Cluster 4 — Long tail / high conversion (informational + transactional)**

Low volume but extremely specific. These users are close to buying. Easy wins that compound over time.

*Chikmagalur single-origin coffee buy*  
*filter coffee beans for South Indian coffee*  
*washed process coffee meaning*  
*light roast coffee India online*  
*how to start enjoying black coffee*  
*coffee gift set India online*

## Content architecture — pillar + cluster model

Each pillar page targets a broad head term and links out to supporting cluster articles. This is how topical authority is built — not one-off blogs, but interconnected content ecosystems.

### Pillar 1

#### "The Complete Guide to Specialty Coffee in India"

Targets: "specialty coffee India", "what is specialty coffee". Links to: single origin guide, Arabica vs Robusta, coffee regions of India, flavour notes explained. Internal links to Blue Tokai's estate selection page.

### Pillar 2

#### "The Home Brewing Bible — Every Method Explained"

Targets: "how to brew coffee at home", "pour over coffee guide". Links to: french press ratio, moka pot guide, AeroPress vs pour over, cold brew at home. Internal links to equipment pages after each method.

### Pillar 3

#### "Understanding Coffee Origins — India's Best Estates"

Targets: "Chikmagalur coffee", "Coorg coffee", "Nilgiris coffee". Blue Tokai's unique advantage — they actually source from these estates. Each regional article links to the estate's bean page on-site.

### Pillar 4

#### "Coffee Subscriptions — Is It Worth It?" (Commercial pillar)

Targets: "coffee subscription India", "freshly roasted coffee delivered". Comparison format answers the question honestly, then lands naturally on Blue Tokai's subscription as the recommendation. Email capture CTA.

# On-page & technical SEO requirements

## On-page essentials

- Title tags: primary keyword front-loaded, under 60 chars
- Meta descriptions: include keyword + a compelling hook, under 155 chars
- H1 → H2 → H3 hierarchy — one H1 per page, only
- Schema markup: Article schema on blogs, Product schema on product pages, FAQ schema on guides
- Image alt text: descriptive, keyword-relevant on every image
- URL structure: /blog/how-to-make-pour-over-coffee (not /blog/post-12)
- Internal linking: every article links to at least 2 related articles + 1 product page
- Word count: pillar pages 2,500+ words, cluster articles 1,000–1,500 words

## Technical SEO baseline

- Core Web Vitals: LCP under 2.5s, CLS under 0.1 (critical for Shopify sites)
- Mobile-first: 70%+ of Indian specialty coffee searches are mobile
- Sitemap: submit XML sitemap to Google Search Console
- Crawl health: fix broken links, redirect chains, 404s monthly
- Page speed: compress images (WebP format), lazy load below-fold content
- Canonical tags: prevent duplicate content across product variants
- Robots.txt: ensure blog and product pages are fully crawlable
- HTTPS + clean URL structure: already on Shopify — verify no redirect loops

# Off-page SEO — link building approach

## Digital PR — the most effective method in 2025

Pitch data-led stories to food and lifestyle publications: "India's specialty coffee map", "The rise of single origin coffee in Indian homes." Targets: Vogue India, Condé Nast Traveller, Scroll, Mint Lounge, The Hindu. Each earned feature = high-DA backlink + brand authority.

### **Guest content on relevant platforms**

Contribute brewing guides and coffee culture pieces to: Homegrown, ScoopWhoop Food, Gourmet India, food-focused newsletters. Include a bio link back to Blue Tokai's website. Choose platforms where the target audience already exists.

### **Linkable asset creation**

Publish an annual "State of Specialty Coffee in India" report using their own sourcing data. Original data = natural backlinks from journalists, bloggers, and industry publications. This is a link magnet that works for 2–3 years.

### **Broken link reclamation**

Use Ahrefs to find broken links on coffee and food lifestyle sites pointing to dead competitor pages. Pitch Blue Tokai's equivalent content as a replacement. Low effort, high-value links.

### **Farmer + estate co-content**

Collaborate with partner estates to co-publish origin stories. Their local and agricultural networks create backlinks from estate websites, the Coffee Board of India, and agri-journalism outlets—niche but highly relevant DA.

## **Tools & resources needed**

### **Ubersuggest**

Keyword research, competitor gap analysis, backlink monitoring, broken link building, rank tracking

### **Google Search Console**

Track impressions, clicks, CTR, indexing status, Core Web Vitals alerts — essential, use from day one

### **Google Analytics 4**

Organic traffic source tracking, goal completions (subscription signups, quiz completions), user behaviour on blog

### **Screaming Frog SEO Spider**

Technical crawl — find broken links, duplicate content, missing meta tags, crawl errors — run monthly

### **Google Keyword Planner**

India-specific search volumes, seasonal trends, keyword ideas — pair with Ahrefs for full picture

## Google Sheets

Content calendar management — track keyword targets, publish dates, author, internal links, word count

# 3-month execution roadmap

## Month 1 — Foundation

- Set up GSC, GA4, connect Ahrefs
- Full technical audit via Screaming Frog — fix critical issues
- Keyword mapping: assign 1 primary KW to every existing page
- Optimise existing blog posts — fix titles, meta, H-tags, internal links
- Publish Pillar 1: "Complete Guide to Specialty Coffee in India"
- Publish 3 cluster articles from Cluster 1 (discovery KWs)
- Add FAQ schema to top 5 blog posts
- Submit updated sitemap to Google

## Month 2 — Build

- Publish Pillar 2: "Home Brewing Bible"
- Publish 4 cluster articles from Cluster 2 (brewing KWs)
- Launch Digital PR outreach — pitch 5 publications with coffee data story
- Begin broken link reclamation (Ahrefs competitor backlink gap)
- Add Product schema to all bean product pages
- Set up internal link audit — ensure every new article links to a product
- Start tracking keyword rankings weekly in Ahrefs
- Guest content pitch: 2 lifestyle/food publications

## Month 3 — Compound & convert

- Publish Pillar 3: "India's Best Coffee Estates" + Pillar 4: "Coffee Subscriptions Guide"
- Publish 4 more cluster articles from Clusters 3 & 4 (commercial + long tail)
- Publish "State of Specialty Coffee in India" linkable asset — pitch to press
- Review GSC: identify which articles have impressions but low CTR → rewrite title/meta
- Update Month 1 articles with new internal links to Month 2 & 3 content
- Begin estate co-content collaborations for niche backlinks
- Measure: organic sessions, keyword rankings, backlinks acquired, D2C conversions from organic

## Expected outcomes — end of month 3

## Google Ads / PPC

### PPC funnel — how the campaigns work together

### Campaign structure — 4 campaign types

#### Campaign 1—Search Ads (Bottom funnel priority) ₹40,000, 40% of budget

Captures people actively searching to buy or learn. Highest intent, highest CPC, highest conversion rate.

#### Ad Groups

##### Ad Group 1 — Branded

Blue Tokai coffee, Blue Tokai beans, Blue Tokai subscription, Blue Tokai online

### **Ad Group 2 — Purchase intent**

buy specialty coffee online India, freshly roasted coffee beans. India single origin coffee buy online, coffee subscription India, Chikmagalur coffee buy

### **Ad Group 3 — Gifting**

coffee gift set India, premium coffee hamper online, coffee gift for husband, coffee lover gift India

### **Negative keywords (block irrelevant clicks**

Nescafe, Instant coffee, Bru coffee, Free coffee, Starbucks, Coffee meaning, Coffee history

Bid strategy: Maximize Conversions → shift to Target ROAS after 30-day data · Match types: Phrase + Exact only (no broad on Day 1)

## **Campaign 2 — YouTube Video Ads (top-funnel awareness), ₹20,000**

15–30 sec non-skippable or skippable in-stream. Targets people who haven't heard of Blue Tokai. Campaign angle: "Apna Wala Cup" — the quiet morning ritual, the platonic coffee moment.

### **Targeting**

- In-market audiences: Food & Drink enthusiasts, Online shoppers
- Custom intent: people who searched "specialty coffee", "pour over", "coffee subscription"
- Affinity: Cooking & Dining, Health-conscious consumers
- Placements: Coffee, lifestyle, productivity YouTube channels in India
- Geo: Delhi NCR, Mumbai, Bengaluru, Hyderabad, Pune — Tier 1 only

CPV (cost per view) India benchmark: ₹0.25–₹1.50 · Estimated 15,000–40,000 views/month at this budget

## **Campaign 3 — Remarketing (Highest ROI campaign), ₹25,000, 25% of budget**

### **Audience segments**

- Segment A — Visited product/bean pages, didn't purchase → Show product-specific ad with "Free delivery" hook

- Segment B — Added to cart, abandoned → Show urgency ad: "Your beans are waiting. Freshly roasted."
- Segment C — Quiz completers (no purchase) → Show personalised bean recommendation ad
- Segment D — Blog readers (3+ min on site) → Soft subscription angle: "You read about it. Now taste it."

Runs across: Google Display Network + YouTube + Gmail · Frequency cap: 3 impressions/user/day

## **Campaign 4 — Performance Max / Shopping (Direct D2C revenue),**

₹15,000, 15% of budget

Product groups to prioritise

- Bestselling bean SKUs (Attikan Estate, Vienna Blend)
- Subscription plans — highest LTV, optimise for signup
- Gift sets — seasonal spike around holidays & Valentine's
- Brewing equipment — high AOV, lower competition

Feed quality is everything — optimise product titles, images, and descriptions in Merchant Center before launching · Target ROAS: 300%+

## Monthly budget plan—₹100,000 total

## Targeting strategy—layered approach

### Geographic targeting

#### Tier 1 — Primary spend (80%)

- Delhi NCR, Mumbai, Bengaluru
- Hyderabad, Pune, Chennai
- Highest specialty coffee awareness + Blue Tokai café presence

#### Tier 2 — Reduced bid (20%)

- Jaipur, Ahmedabad, Kolkata, Chandigarh
- 30–50% lower CPC than metros
- Emerging specialty coffee audiences — high organic growth potential

### Audience targeting

#### Demographic

- Age: 25–45 primary, 18–24 secondary
- Household income: Top 30% (metro skew)
- Device: Mobile-first (70% of Indian searches)

#### Interest & intent signals

- In-market: Food & beverage online shoppers

- Affinity: Cooking enthusiasts, Health & wellness
- Custom intent: searched competitor brands, brewing terms
- Life events: Recently moved, new home — coffee setup moment

## Day-parting & device bid adjustments

- +20% bid: 6–9am (morning coffee search peak)
- +15% bid: 7–10pm (evening browsing, post-dinner)
- –30% bid: 1–5am (minimal conversion intent)
- Weekend premium: +10% Saturday (gifting searches spike)
- Mobile: Base bid (dominant device in India)
- Desktop: +15% bid (higher AOV conversions)
- Tablet: –10% bid (lowest conversion rate)
- Branded searches: Target ROAS 500%+ (protect brand terms cheaply)

## Sample ad copy — search campaigns

bluetokaicoffee.com › coffee › subscription

Roasted to order. Delivered in 24hrs to Delhi, Mumbai & Bangalore. From 80+ Indian estates. Start your subscription today — use code TRY10 for ₹100 off your first order.

bluetokaicoffee.com › gifts

**Coffee Gifts They'll Actually Love | Blue Tokai Gift Sets**  
**Curated Specialty Coffee Hampers | Free Gift Wrapping**  
Stop gifting the same old things. Give them the best coffee of their life — single origin beans, brewing guide & handwritten note. Ships across India in 2 days.

bluetokaicoffee.com › beans

**Buy Specialty Coffee Beans Online | Roasted This Week**  
**Farm-Named, Estate-Direct | India's Top Roastery**  
Know exactly where your coffee comes from. Every bag na  the farmer, the estate, the altitude. Try Chikmagalur's finest — light, fruity, unforgettable. Free shipping ₹599+.

## Landing page strategy

### Landing page rules

- Ad keyword must appear in the page H1 within 3 seconds of load

- Page load time under 2.5s on mobile — critical in India
- Single CTA per page: "Subscribe," "Buy Now," or "Take the quiz"
- Trust signals above the fold: estate names, roast date, delivery promise
- No navigation header — remove distractions on paid landing pages

#### **Page → Ad group mapping**

- Branded search → Subscription landing page (LTV focus)
- Purchase intent → Category page + bean filter
- Gifting → Gift sets page with wrapping offer
- Remarketing cart abandon → Same product page + urgency strip
- YouTube clicks → Campaign landing page (Apna Wala Cup story)

## **Tools & resources needed**

### **Google Ads Manager**

Campaign creation, keyword bidding, ad copy, scheduling, budget management — the core platform. Requires Google account + billing setup with 18% GST factored in.

### **Google Merchant Center**

Required for Shopping & PMAX campaigns—upload product feed, sync with Shopify, optimise product titles and images for Shopping tab visibility

### **Google Analytics 4 + Conversion Tracking**

Link GA4 to Google Ads—track purchases, subscription signups, and quiz completions as conversion goals. Without this, Smart Bidding has no signal to optimize against.

### **Google Tag Manager**

Deploy conversion tags, remarketing pixels, and event tracking without needing developer support for every change

### **Google Keyword Planner**

India-specific search volume and CPC estimates before launch—validate keyword choices and forecast budget

### **Shopify landing pages**

Build dedicated landing pages per ad group—critical for Quality Score. If on Shopify, use native pages; otherwise, Unbounce integrates with most stacks.

## **1-month execution timeline**

## **Week 1**

### **Setup & foundation**

- Set up GA4 conversion tracking (purchase, subscription, quiz start) — no campaign should run without this
- Link Google Ads ↔ GA4 ↔ Google Merchant Center
- Upload product feed to Merchant Center, fix any feed errors
- Build keyword list with Keyword Planner — validate CPCs in India
- Write 3 ad copy variants per ad group (A/B from Day 1)
- Set up remarketing audience lists (site visitors, cart abandoners, blog readers)

## **Week 2**

### **Launch + early observation**

- Launch Search campaign (Branded + Purchase intent ad groups first)
- Launch PMAX campaign with bestselling 5 SKUs only — keep it narrow
- Set bid strategy: Maximize Clicks initially (gather data before switching to Conversions)
- Monitor: Search terms report daily — add irrelevant terms to negative keyword list
- Check Quality Scores day 5 — anything below 6/10 needs landing page or copy fix

## **Week 3**

### **Remarketing + YouTube launch**

- Remarketing audiences should have 100+ users by now — launch Display remarketing
- Launch YouTube campaign (need minimum 15-sec video asset — can use existing Instagram Reel content repurposed)
- Switch Search bid strategy from Maximize Clicks → Maximize Conversions (30+ clicks gathered)
- Launch Gifting ad group if Valentine's / seasonal hook is active
- Pause any ad groups with zero clicks after 7 days — reallocate budget

## **Week 4**

### **Optimise + report**

- Review ROAS per campaign — double budget on top performers
- A/B ad copy winner — pause lower CTR variant, write a new challenger
- Check impression share — if below 50%, either increase bid or reduce targeting scope

- Review device performance—adjust mobile vs desktop bid modifiers based on data
- Set up automated rules: pause keywords with CPC 3x target CPA and alert if daily spend exceeds 120% of plan
- Build Month 1 performance report — ROAS, CPC, CTR, conversions, cost per acquisition

## Expected outcomes — end of month 1

|                                |                            |                           |                           |                            |

# Social Media Marketing

## Platforms selected & justification

### Instagram — Primary platform

516M users India · #1 favourite platform (38.3%) · 25–34 is the largest age group

#### Why Instagram wins for Blue Tokai

- Visual-first platform — coffee is one of the most photographed categories globally
- Target demographic (25–34 urban millennials) is Instagram's largest Indian segment
- Reels reach non-followers organically — best free distribution tool available
- Stories drive daily brand touchpoints without content fatigue
- Shopping tags link directly to product pages—D2C conversion in-app
- Campaign angle ("Apna Wala Cup") is inherently visual and intimate—a perfect fit

## **YouTube — Secondary platform (long-form authority)**

491M ad reach India · 29hr 37min/month avg · #1 by advertising reach

Why YouTube for Blue Tokai

- Highest advertising reach of any platform in India — 491M users
- Coffee how-to content is searched heavily on YouTube ("how to make pour-over," etc.)
- Long-form videos build deeper trust than any other format—brand credibility
- YouTube Shorts feeds into Instagram Reels strategy—repurpose content
- Videos rank in Google Search — SEO and social working together
- Estate origin story documentaries live permanently and compound views over time

## **Facebook — Supporting platform (community + paid ads)**

677M users India Dec 2025 · 25–34 largest segment · Key for Meta ad targeting

Why Facebook still matters

- Meta Ads Manager runs Instagram + Facebook simultaneously — same creative, doubled reach
- Facebook Groups: "Coffee lovers India", "Home Brewers India" — community seeding
- Facebook Events for café launches, coffee tastings — free local reach
- Older premium audience (35–50) is more active on Facebook than Instagram
- Gifting campaigns (Valentine's, festive) perform well in Facebook feed format

Why NOT LinkedIn, Twitter/X, or Pinterest? LinkedIn's Indian audience skews B2B — useful later for corporate gifting outreach but not for D2C consumer growth. Twitter/X has declining engagement in India and negligible e-commerce conversion. Pinterest has low Indian penetration. Focus beats presence everywhere.

# 30-day content calendar — week by week

## Week 1 — Days 1-7 · Theme: "Your cup, your world" — launch the brand voice

| Mon                                                                                         | Tue                                                                      | Wed                                                                                            | Thu                                                                              | Fri                                                                                    | Sat                                                                                       | Sun                       |
|---------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|---------------------------|
| Reel: 6am solo cup ritual. No voiceover. Just ambient sound.<br>Instagram · Campaign launch | Story: "What does your morning cup feel like?" Poll<br>Instagram Stories | Carousel: "5 things your coffee is telling you about yourself"<br>Instagram · Pillar 1 content | YouTube: How to make pour over at home — 10 min tutorial<br>YouTube + Shorts cut | Static: Campaign visual — "Before the world wakes up, there's this."<br>Instagram Feed | Reel: Barista hand-pouring in slow motion. Estate name revealed at end.<br>Instagram + FB | Rest / schedule next week |

## Week 2 — Days 8-14 · Theme: "The people in your cup" — platonic love angle

| Mon                                                                                               | Tue                                                                                   | Wed                                                                                         | Thu                                                                                  | Fri                                                                                               | Sat                                                                              | Sun  |
|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|------|
| Reel: Two friends making coffee together. Unscripted. Real laughter.<br>Instagram · Platonic love | Story: "Tag your Blue Tokai person" sticker prompt<br>Instagram Stories · UGC trigger | Carousel: "AeroPress vs French Press vs Pour Over — which is you?"<br>Instagram · Education | YouTube: Farm estate mini-doc — Attikan Estate, Chikmagalur<br>YouTube · Brand story | Static: Copy-led post — "The one who knows your order. That's love."<br>Instagram Feed · Campaign | UGC spotlight: Repost best #ApnaWalaCup community content<br>Instagram + Stories | Rest |

## Week 3 — Days 15-21 · Theme: "Discover your taste" — identity + product bridge

| Mon                                                                                                     | Tue                                                                                                          | Wed                                                                                            | Thu                                                                                              | Fri                                                                                                               | Sat                                                                                          | Sun  |
|---------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|------|
| Reel: "I used to add 3 spoons of sugar. Now I don't. Here's what changed."<br>Instagram · Taste journey | Story: Quiz "Are you a light or dark roast person?" — link to website quiz<br>Instagram Stories · Conversion | Carousel: "What cold brew really is — and how to make it in 12 hours"<br>Instagram · Education | YouTube: "How to start enjoying black coffee" — beginner's honest guide<br>YouTube · SEO content | Static: "Chikmagalur. ## Content frequency — by platform

|                                                                                             |                      |
|---------------------------------------------------------------------------------------------|----------------------|
| <b>Instagram Reels</b><br>Hero format · cold audience reach · campaign storytelling         | 3× / week            |
| <b>Instagram Stories</b><br>Daily brand touchpoint · polls, CTAs, behind the scenes         | 5–7× / week          |
| <b>Instagram Carousels</b><br>Education, brewing guides, product comparisons                | 2× / week            |
| <b>Instagram Static posts</b><br>Campaign visuals, estate photography, copy-led brand posts | 1× / week            |
| <b>YouTube long-form</b><br>Tutorials, estate docs, subscription guides — evergreen SEO     | 1× / week            |
| <b>YouTube Shorts</b><br>Repurposed Reels — no extra production needed                      | 2–3× / week          |
| <b>Facebook</b><br>Auto-publish from Instagram · Events + Group community engagement        | Auto + 2 native/week |

## Organic strategy — 4 pillars of non-paid content

### Pillar A — Campaign content

Apna Wala Cup universe

- Every week has at least 1 piece tied to the campaign — solitude, platonic love, or self-discovery
- Copy is emotional but never preachy — observe, don't lecture
- Cinematography: natural light, real hands, quiet environments — no overproduced studio look
- Brand voice: warm, understated, slightly poetic — think Humans of New York meets specialty coffee

### Pillar B — Education content

Be the best coffee teacher in India

- Brewing guides, flavour explainers, origin stories — repurposed from blog content
- Carousel format = highest saves on Instagram = long-term algorithmic reach
- "Save this for your next brew" CTA on every educational post

- YouTube tutorials rank on Google Search — organic discovery flywheel

### **Pillar C — UGC & community**

#ApnaWalaCup community engine

- Seed the hashtag with first 10 posts before asking audience to use it
- Repost the best UGC every week — makes contributors feel seen, drives more submissions
- Weekly Story prompt: "Show us your cup" — lowers barrier to participate
- Comment strategy: reply to every comment in the first hour — signals engagement to algorithm

### **Pillar D — Behind the scenes**

Radical transparency = brand trust

- Roastery: show the actual roasting, the QC cupping, the packing process
- Farm visits: raw, unpolished — dust, hands, cherries, farmers by name
- Team stories: the barista who became a roastmaster — real human career journeys
- Mistakes welcome: "This batch didn't make the cut. Here's why." = massive trust

## **Influencer strategy — micro over mega**

Blue Tokai's campaign is about authenticity and intimacy. A macro influencer with 5M followers reading a script destroys that. Micro-influencers (10K–150K) who genuinely drink specialty coffee are the right fit — higher trust, higher engagement, lower cost.

## **Tier 1 — Micro**

10K–100K followers

- Lifestyle, wellness, homecafe creators
- Brief: Morning ritual content, platonic friendship cup moments
- Deliverable: 1 Reel + 3 Stories/month
- Compensation: Product gifting + ₹5,000–15,000
- Target: 4–6 creators/month

## **Tier 2 — Mid**

100K–500K followers

- Food creators, productivity YouTubers, lifestyle vloggers
- Brief: Integration into regular content — "my morning setup"
- Deliverable: 1 YouTube integration + 2 Reels/month
- Compensation: ₹25,000–60,000
- Target: 1–2 creators/month

## **Non-negotiable brief rules**

For all influencers

- No scripted dialogue — must feel natural
- Platonic angle encouraged: feature a friend, not a romantic partner
- Must disclose paid partnership clearly
- Blue Tokai approves concept, NOT script
- Must use #ApnaWalaCup in caption

## **Paid social strategy — Meta Ads (Instagram + Facebook)**

Organic builds the brand. Paid amplifies what's already working. The rule: only boost content that organically performed well — never force a weak post with budget.

## **Campaign objectives by funnel stage**

Awareness: Boost top Reels to lookalike audiences — "people similar to your followers." Goal: reach cold audiences. Objective: Video Views / Reach.

Consideration: Boost carousels and educational posts to warm audiences (page visitors, video viewers). Objective: Traffic to website / Quiz.

Conversion: Retarget website visitors and quiz completers with product-specific ads and subscription offers. Objective: Purchases / Subscriptions.

Retention: Email custom audiences — existing customers shown new bean drops, gift content. Objective: Repeat purchase.

## **Tools & resources needed**

### **Meta Business Suite**

Schedule Instagram + Facebook posts, manage inbox, run paid ads across both platforms from one dashboard — the core operating tool

### **Later / Buffer**

Content calendar management, visual grid preview (critical for Instagram aesthetic), scheduled posting, hashtag suggestions, best time to post analytics

### **CapCut / Adobe Premiere Rush**

Reel and YouTube Short editing — CapCut is free and used by most Indian creators. Essential for subtitles, text overlays, ambient sound mixing

### **Canva Pro**

Carousel design, Story templates, campaign static visuals, YouTube thumbnails — maintain brand consistency with a shared team workspace

### **Instagram Native Analytics + YouTube Studio**

Track reach, impressions, saves, shares, watch time, audience demographics — check weekly, not daily. Free and accurate.

### **Google sheets**

Content calendar, brief templates, influencer tracking, UGC log — shared team workspace so nothing falls through

## 30-day KPIs — platform by platform

### Instagram

+8%

Follower growth

5-8%

Reel engagement rate

500+

Story replies & DMs

300+

#ApnaWalaCup posts

1,000+

Carousel saves

2%+

Story link CTR

### YouTube

4

Videos published

50%+

Avg watch time (long-form)

500+

New subscribers

5,000+

Total video views

### Paid Social (Meta)

5M+

Total impressions

₹9-12

Target CPM

1.5%+

Ad CTR

150+

Paid conversions

**The platform hierarchy is built on data, not habit.** Instagram is India's favourite platform with 38.3% of users ranking it #1, while YouTube leads video consumption with all 491 million social media users accessing it monthly — Indians spend an average of 29 hours and 37 minutes on YouTube per month.

**Why micro-influencers over mega is the correct call here specifically.** Blue Tokai's campaign is built around authenticity, quiet intimacy, and self-discovery. A mega influencer reading a script about "the best specialty coffee" will feel like exactly what it is — an ad. A micro-influencer with 30,000 followers who genuinely wakes up at 6am and makes pour over will feel like a friend. According to a Rakuten Insight survey on consumer attitudes to social media advertising in India, social media ads developed by trusted brands were reported by over 60% of respondents to have the most impact — and trust is built through people, not production budgets.

# Email Marketing

## Why email is the most important channel for Blue Tokai D2C

### The inbox advantage

- You own the list — Instagram can shadowban you, Google can de-index you. Your email list is yours forever.
- India email CTR is 8.2% — the second highest globally, contradicting the "email is dead in India" myth
- Email averages 36× ROI per ₹1 spent — highest of any digital channel
- Subscription business model is fundamentally email-powered — retention, renewal, and upsell all happen in the inbox

### Blue Tokai's email opportunity

- Every quiz completion, blog visit, and purchase is an email capture moment — currently underleveraged
- Coffee is a repeat purchase — the inbox is where loyalty is built between orders
- Campaign storytelling ("Apna Wala Cup") is better suited for email than any other channel — no algorithm, no character limit, no noise
- Abandoned cart and browse abandonment flows alone can recover 5–15% of lost revenue monthly

## Email types

1. Automated drip flows
2. Weekly newsletter
3. Product & launch emails
4. Promotional & offer emails
5. Transactional emails
6. Re-engagement emails

## Drip flow 1 — Welcome sequence (most important flow)

This is the most read sequence you'll ever send. First impressions are permanent. The welcome sequence is where Blue Tokai sets its emotional tone — not a sales pitch, but the beginning of a relationship.

Day 0 — Immediate

Welcome to Blue Tokai **Emotional**

Not a generic "Thanks for signing up." Open with a story — the estate, the farmer, the altitude. "Before this cup reached you, someone woke up at 4am on a hillside in Chikmagalur." Deliver the quiz result if they came from the quiz. No hard sell. Close with: "We'll see you in your cup."

Day 2

Your first brew guide **Educational**

Based on quiz result — send the brewing method guide most relevant to them. Pour over person gets pour over guide. French press person gets french press guide. Personalisation from Day 1. Includes product recommendation for the right beans. CTA: "Start with this bean."

Day 5

The people behind your cup **Emotional**

Farm estate story. Feature a real farmer by name. Photo of the estate. The altitude, the processing method, why it produces the flavour it does. This is Blue Tokai's moat — no competitor can replicate this story. CTA: "Shop this estate's beans." Low-pressure.

Day 8

The subscription offer **Conversion**

First and only hard sell in the welcome sequence. They've been warmed up for 8 days. Now make the ask. Lead with the benefit: "Fresh beans every month, 20% off, cancel anytime." Use TRY10 code for first order. Urgency: "Offer valid for the next 48 hours." Clear single CTA button.

If no purchase: gentle re-engage **Re-engage**

Not another offer — a different angle. "Which of these sounds most like you?" — a simple 2-option preference email that re-qualifies them for future segmentation. If they click "I brew at home" → goes into home brewer segment. If they click "I drink at cafés" → goes into café segment. Smart passive data collection.

## Drip flow 2 — Abandoned cart (highest revenue recovery flow)

Triggered: 1 hour after cart abandoned without purchase

Hour 1

Gentle reminder — product-led

No guilt. Just a reminder. Show the exact product they left behind. "Your [Attikan Estate beans] are still waiting."  
Roast date freshness angle: "We roast on order — these will be freshest if you order in the next 24 hours." Direct cart link.

Day 2

Social proof — build confidence

Customer review of the exact product they left. Real name, real quote. "982 people are drinking this right now."  
Addresses the unspoken objection: "Is this actually good?" Freshness CTA reinforced.

Day 4 (if still no purchase)

Last chance + small incentive

"We're about to let this go." Free shipping offer or 5% discount — only if the cart value justifies it. Don't train customers to abandon carts for discounts by doing this too often. Use sparingly, only on high-value carts (₹999+).

## **Drip flow 3 — Post-purchase & subscription nurture**

Triggered: On purchase confirmation

Day 0

Roast day notification

"Your beans are being roasted right now." Build anticipation. Photo of the roastery. Not just an order confirmation — an event.

Day 3 (after delivery)

Brew guide for their specific bean

"Your [Vienna Blend] arrived. Here's how to make the perfect cup." Brewing guide specific to the roast level they bought. Reduces returns, increases satisfaction.

Day 10

Review request + subscription ask

"You've been brewing for 10 days. How's it going?" Star rating + text review. If 4–5 stars → subscription upsell immediately. If 1–3 stars → customer service intervention, not a sales pitch.

## **Weekly newsletter — "The Tuesday Cup"**

The rule: make it something people look forward to — not something they tolerate. If someone opened last week, they should be excited to open this week.

| Newsletter structure (4 sections, under 500 words)                                                                                                                                      | Sample subject lines                                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>① Opening — 2 sentences</b><br>A quiet, observational line about coffee, mornings, or the week. Sets the emotional tone. Never starts with "This week at Blue Tokai..."              | <b>The quietest part of your day deserves the best coffee.</b><br><i>This week: why altitude changes everything about your cup.</i>               |
| <b>② The story — 150 words</b><br>One thing worth knowing — a farm update, a brewing insight, a moment from the roastery, a coffee culture piece. No product push here.                 | <b>Raju's harvest is in. Here's what that means for you.</b><br><i>The Attikan estate just finished its best picking season in 4 years...</i>     |
| <b>③ This week's bean — 80 words</b><br>One featured product with tasting notes, estate origin, why this week. Soft product integration — never a hard sell within the newsletter body. | <b>Try this on a slow Saturday.</b><br><i>A 12-hour cold brew you start tonight and thank yourself for tomorrow...</i>                            |
| <b>④ One thing to try — 1 sentence + CTA</b><br>A brewing experiment, a recipe, or the quiz link. Ends with a single CTA button. Always one CTA — never three. Never "click here."      | <b>The person who knows your order. (A short story.)</b><br><i>Before we talk about coffee, we want to talk about something more important...</i> |

### Subject line rules

- Under 45 characters — mobile preview shows ~40 chars
- No ALL CAPS, no multiple exclamation marks — spam triggers
- Never start with "We" — start with "You", a verb, or a scene
- A/B test subject line on 20% of list before full send

## List segmentation strategy

Sending the same email to everyone is the fastest way to increase unsubscribes. Segmentation increases open rates by 14% and revenue per email by 58%. Blue Tokai has rich data to segment on — use it.

### Segment 1 — Subscribers by brew method

From quiz data — pour over, French press, moka pot, cold brew. Each gets brewing-method-specific content and product recommendations. Never send a pour over guide to a French press person.

### Segment 2 — Purchase history

Never purchased → welcome + offer flow. 1 purchase → conversion to subscription nudge. 2+ purchases → loyalty tier, upsell to premium estates. Subscription active → retention + upgrade content.

### **Segment 3 — Roast preference**

From quiz or purchase data — light, medium, or dark roast. New bean drops and product emails only go to subscribers who match the roast profile. Light roast people don't get a dark roast new arrival email.

### **Segment 4 — Engagement level**

Active (opened in last 30 days) → full newsletter + product emails. Warm (opened in 31–60 days) → reduced frequency, re-engagement nudge. Cold (60+ days no open) → win-back sequence → if no response, remove cleanly.

### **Segment 5 — Gifting vs personal use**

From purchase history — people who bought gift sets in Nov–Feb get a gifting campaign before every major holiday. People who buy for themselves get subscription and new bean content. Different goals, different emails.

## **Sending frequency by email type**

### **Welcome drip sequence**

5 emails over 12 days — automated, triggered by signup  
Automated

### **Weekly newsletter "The Tuesday Cup"**

Every Tuesday at 7am IST — to full engaged list  
1× / week

### **Abandoned cart flow**

3 emails over 4 days — triggered by cart abandonment  
Automated

### **Post-purchase nurture**

3–4 emails over 45 days — triggered by purchase  
Automated

### **New bean / product launch**

Segmented by roast preference — not to full list  
1–2× / month

**Promotional offer email**

Scarcity preserved — max 2 per month, ideally 1  
1–2× / month

**Subscription renewal notice**

7 days before charge — automated, transparent  
Automated

**Win-back sequence**

3 emails over 2 weeks — triggered at 60 days no open  
Automated

**Total emails (active subscriber, typical month)**  
Newsletter + 1–2 product + 1 promo + any triggered flows

6–8 emails/month max

## Platform recommendation — Klaviyo vs Brevo vs Mailchimp

**Recommended****Klaviyo****Purpose-built for D2C e-commerce**

- Native Shopify integration — syncs purchase history, browse behavior, cart events in real time
- Predictive analytics — forecasts customer LTV, churn risk, next purchase date
- Advanced segmentation by purchase behavior — not just demographics
- All e-commerce flows (abandoned cart, post-purchase, browse abandonment) built-in
- Revenue attribution per email — know exactly which email drove which sale

Cost: Free up to 250 contacts · ~\$45/mo at 1,000 contacts · Scales with list

**Budget alternative****Brevo (formerly Sendinblue)****Best value if budget is tight**

- Charges per email sent, not per contact — cost-effective for large lists with lower frequency

- Unlimited contacts on free plan (300 emails/day limit)
- Includes WhatsApp + SMS marketing — useful for India
- Automation is solid but not as deep as Klaviyo for e-commerce
- Shopify integration works but lacks real-time behavioral triggers

Cost: Free tier available · ₹1,700/mo (Starter) · Good starting point

**Not recommended for scale**

**Mailchimp**

**Good for beginners, weak for D2C**

- Easiest UI — good if the team has no email marketing experience
- Shopify integration historically patchy — requires workarounds
- Advanced segmentation locked behind Premium tier
- Counts unsubscribed contacts toward billing limit — costs inflate
- No predictive analytics — can't forecast subscriber behavior

Cost: Free up to 500 contacts · Costs escalate fast at scale

## **Tools & resources needed**

**Klaviyo (primary platform)**

Email creation, automation flows, segmentation, revenue attribution, Shopify integration, A/B testing — the entire email operation runs here

**Figma / Canva**

Email header design, promotional banner creation — maintain visual consistency with social media assets. Export as PNG for embedding in Klaviyo templates.

**Klaviyo Forms (or Typeform)**

Embedded quiz and email capture forms — pop-ups on blog, exit-intent on product pages. Feeds directly into Klaviyo segmentation with quiz response data.

**Shopify + Klaviyo integration**

One-click connection — syncs all purchase events, browse data, cart actions in real time. Foundation of every automated flow. Set up in Week 1 before any campaigns launch.

**Grammarly**

Every email proofread before send — especially subject lines. One typo in a subject line destroys brand credibility. Non-negotiable step in the send checklist.

### Litmus / Email on Acid

Preview how every email renders across Gmail, Apple Mail, Outlook, and mobile clients before sending. Broken layouts on mobile = instant delete in India where 97% access via smartphone.

## Expected outcomes—benchmarks vs targets

**The platform decision is the most consequential technical choice in this entire section.**

Klaviyo was built from the ground up for e-commerce — not adapted for it — with deep Shopify integration, real-time purchase behavior tracking, and revenue-generating automations triggered by actual buying data. For a D2C brand where subscriptions are the revenue target, this isn't optional sophistication — it's the foundation.

**India is a uniquely strong email market.** Email click-through rates in India increased to 8.2% — the second highest among all countries — with a click-to-open rate reaching an impressive 31.8%, directly contradicting the ongoing narrative that email is dead in India. Blue Tokai's educated, urban, premium audience skews even higher than that average. This is a channel with real compounding power here.

**The newsletter name matters more than it sounds.** "The Tuesday Cup" gives the email a personality, a ritual, and a reason to exist beyond promotion. Industries that educate, entertain, or inspire rather than just sell earn deeper loyalty and stronger lifetime value — and intent-based campaigns supported by AI-driven segmentation deliver stronger email benchmarks and build long-term brand equity. A named newsletter with a consistent voice is the single highest-trust email format available to a brand.

## Content Marketing / Blogging

# Content philosophy for Blue Tokai

## The 70 / 20 / 10 content split

- 70% Informational — educate, build trust, earn traffic
- 20% Consideration — comparisons, "best of" lists, buyer guides
- 10% Conversion — subscription pitch, product-led storytelling

## Non-negotiable rules for every article

- One primary keyword per article — never keyword stuff
- Every article links to at least one product or subscription page
- End every guide with an email capture or quiz CTA
- Minimum 1,000 words — pillar articles 2,500+

## Content formats

### Guide

#### Step-by-step how-to

Best for: brewing methods, beginner explainers, processes. Structure: intro → why it matters → steps → tips → product CTA. Ideal length: 1,200-2,000 words.

### Comparison

#### X vs Y decision pieces

Best for: method comparisons, brand comparisons, bean type differences. Structure: quick verdict → criteria → deep dive → recommendation. Captures high-intent searches. 1,000-1,500 words.

### Listicle

#### Ranked or curated lists

Best for: gifting, "best of", personality pieces. High shareability. Structure: intro → numbered list with brief explanation per item → CTA. 800-1,200 words. Easy to update annually.

### Origin story

#### Farm / culture narrative

Best for: estate features, coffee culture, campaign-linked emotional content. Structure: scene-setting → the story → what it means for your cup → product link. Blue Tokai's unique advantage. 1,000-1,500 words.

### FAQ

#### Question-and-answer format

Best for: troubleshooting (bitter coffee, wrong grind), quick explainers. Earns FAQ schema rich snippets in Google. Structure: question headline → concise answer → expand with context. 800-1,200 words.

### Pillar

#### Comprehensive cornerstone

Best for: broad head keywords — "specialty coffee India", "home brewing guide." Acts as a hub that links to all cluster articles. 2,500-4,000 words. One per theme cluster. Built in Month 1.

# On-page SEO checklist

## Before writing

- Identify 1 primary keyword + 2–3 secondary keywords
- Check search intent: is this guide, list, or comparison intent?
- Review top 3 Google results — match or exceed their depth
- Map the internal link: which product or pillar page does this link to?
- Decide the CTA: quiz, subscription, product page, email capture

## While writing / publishing

- Primary keyword in: H1, first 100 words, one H2, meta title, URL slug
- Secondary keywords woven naturally across body — not forced
- FAQ section at the end → triggers FAQ rich snippets in Google
- Add Article schema markup (via Shopify app or JSON-LD)
- All images: descriptive alt text with keyword where natural
- Internal links: 2 to related articles + 1 to a product/subscription page
- Meta description: under 155 chars, includes keyword + a hook

# Tools & resources needed

## Ahrefs / Ubersuggest

Keyword research, search volume, difficulty scores, competitor content gap analysis — validate every article's keyword before writing

## Google Search Console

Track which articles get impressions, clicks, average position — weekly check after publishing

## Surfer SEO

Content score, NLP keyword suggestions, on-page optimisation while writing — use before publishing every article

## Hemingway App / Grammarly

Readability scoring — target Grade 7–8 reading level. Every article reviewed before publish. Indian audience reads clear, direct English.

## Notion or Google sheets

Content calendar management — track article title, keyword, format, status, publish date, internal link map, CTA type

### Canva / Figma

Blog header images, infographics, visual breakdowns for listicles — brand-consistent visuals for every article

### RankMath / Yoast (if on WordPress) or Shopify SEO apps

Schema markup, meta tag management, XML sitemap — ensure every published article is technically optimised

### Google Analytics 4

Track organic sessions per article, time on page, scroll depth, and goal completions (subscription CTA clicks, quiz starts)

## 30-day content output summary

**The publishing cadence is every other day, not daily.** 12 articles in 30 days is the right pace — it gives time for proper keyword research, decent writing quality, and on-page optimisation on each piece. Publishing daily just to hit a number produces thin content that won't rank and won't convert.

**Day 17 and Day 21 are the two most important articles for the campaign.** "How to start enjoying black coffee" and "The quiet power of a solo morning cup" are where the SEO strategy and the campaign strategy you built earlier converge — they pull organic traffic AND reinforce the "Apna Wala Cup" emotional identity. These should be written with extra care; they're not just blog posts, they're brand statements.

**The Day 24 comparison article is the highest commercial leverage piece.** "Best specialty coffee brands in India" will attract people actively deciding what to buy. Blue Tokai writing this piece honestly — acknowledging competitors fairly but making their own strengths clear — builds more trust than a pure sales page ever would. It also naturally earns backlinks when others reference it.

**Day 30 is the anchor for Digital PR.** The farm estate story isn't just an article — it's the pitch asset. Once published, that piece gets sent to Mint Lounge, Scroll, The Hindu's food section, and food lifestyle newsletters as a link-worthy original piece. The SEO and off-page link building strategy both depend on it.

# Measurement and KPIs

## The measurement philosophy

The north star metric for this entire strategy

Every KPI ladder up to one number: D2C revenue from digital channels. Follower count, impressions, and open rates are health signals — not success metrics. If D2C revenue is growing, the strategy is working.

## Channel 1 — SEO

**Search engine optimisation**  
Compounding, long-term organic traffic and authority

| KPI                                                                  | TARGET (3 MONTHS)                     | PRIORITY   | TRACKED WITH             |
|----------------------------------------------------------------------|---------------------------------------|------------|--------------------------|
| Organic sessions / month<br>Visitors landing from unpaid search      | +40% vs baseline                      | North star | GA4<br>Search Console    |
| Keywords on page 1 Google<br>Primary keywords ranking in top 10      | 15-20 keywords                        | Core       | Ahrefs<br>Search Console |
| Average keyword position<br>Mean ranking across all tracked keywords | Drop from current avg by 5+ positions | Core       | Search Console<br>Ahrefs |
| Organic click-through rate<br>% of impressions that become clicks    | 4-6% (above 3% average)               | Core       | Search Console           |

|                                                                                               |                           |            |                |
|-----------------------------------------------------------------------------------------------|---------------------------|------------|----------------|
| <b>Domain Authority (DA)</b><br>Moz/Ahrefs domain rating improvement                          | +3–5 DA points            | Core       | Ahrefs         |
| <b>Referring domains (backlinks)</b><br>New unique domains linking to bluetokalcoffee.com     | 10–15 new quality domains | Core       | Ahrefs         |
| <b>Organic-attributed conversions</b><br>Purchases / subscription signups from organic search | 150+ conversions          | North star | GA4            |
| <b>Core Web Vitals</b><br>LCP, CLS, FID — Google's page experience signals                    | LCP <2.5s · CLS <0.1      | Watch      | Search Console |

**How to track:** GSC → Performance tab (weekly check, impressions + clicks + CTR + avg position). Ahrefs → Rank Tracker (add 30 target keywords Day 1, track weekly). GA4 → Acquisition → Organic search → set conversion goals for purchase and subscription signup. Monthly: Ahrefs Site Explorer → Backlink profile → Referring domains.

## Channel 2 — Google Ads / PPC

₹

### Paid search & YouTube ads

Immediate intent capture + retargeting + D2C direct revenue

| KPI                                                                            | MONTH 1 TARGET                    | PRIORITY   | TRACKED WITH   |
|--------------------------------------------------------------------------------|-----------------------------------|------------|----------------|
| <b>Return on ad spend (ROAS)</b><br>Revenue ÷ ad spend — the master PPC metric | 250%+ (Month 1) → 400%+ (Month 3) | North star | Google Ads GA4 |
| <b>Cost per acquisition (CPA)</b><br>Ad spend ÷ number of conversions          | ₹800–1,200 per order              | North star | Google Ads     |
| <b>Click-through rate (CTR)</b><br>Clicks ÷ impressions — ad relevance signal  | 4–6% (Search) · 0.5–1% (Display)  | Core       | Google Ads     |
| <b>Average CPC</b><br>Cost per click — efficiency of bidding                   | ₹35–50 (Search) · ₹5–15 (Display) | Core       | Google Ads     |
| <b>Conversion rate</b><br>% of ad clicks that convert to purchase              | 2.5–4%                            | Core       | GA4 Google Ads |

|                                                                                                  |                                 |       |                              |
|--------------------------------------------------------------------------------------------------|---------------------------------|-------|------------------------------|
| <b>Quality Score (per keyword)</b><br>Google's 1-10 score for ad relevance — directly lowers CPC | 7+ on all primary keywords      | Core  | Google Ads                   |
| <b>Impression share</b><br>% of auctions you appeared in vs total eligible                       | 60%+ (Branded) · 30%+ (Generic) | Watch | Google Ads                   |
| <b>YouTube CPV (cost per view)</b><br>Cost per view on video ads                                 | ₹0.50–1.50                      | Watch | Google Ads<br>YouTube Studio |

**How to track:** Google Ads dashboard → Campaigns tab (check daily in Week 1, then 3×/week). GA4 linked to Google Ads → Acquisition → Google Ads → ROAS and conversions. Search Terms report: check daily in first 2 weeks to catch irrelevant queries. Set automated alert rules: pause any keyword with CPC exceeding 3× target CPA. Looker Studio: pull Google Ads + GA4 into a unified daily dashboard.

## Channel 3 — Social media marketing

### Instagram · YouTube · Facebook

Brand awareness, community building, and paid social revenue

| KPI                                                                                           | 30-DAY TARGET                         | PRIORITY   | TRACKED WITH        |
|-----------------------------------------------------------------------------------------------|---------------------------------------|------------|---------------------|
| <b>Instagram Reel reach</b><br>Unique accounts reached per Reel — non-follower reach % is key | 30%+ reach from non-followers         | North star | Meta Business Suite |
| <b>Engagement rate (Reels)</b><br>(Likes + comments + shares + saves) ÷ reach                 | 5–8% (industry avg is 3%)             | Core       | Meta Business Suite |
| <b>Saves per carousel post</b><br>Saves = strongest signal of content quality on Instagram    | 1,000+ saves per educational carousel | Core       | Meta Business Suite |
| <b>Story link CTR</b><br>Swipe-ups / link sticker clicks ÷ story views                        | 2%+ per story with link               | Core       | Meta Business Suite |

|                                                                                     |                              |            |                            |
|-------------------------------------------------------------------------------------|------------------------------|------------|----------------------------|
| <b>#ApnaWalaCup UGC posts</b><br>Community-generated content using campaign hashtag | 300+ posts in 30 days        | Core       | Meta Business Suite        |
| <b>Meta ads ROAS</b><br>Revenue from paid social ÷ Meta ad spend                    | 3× (₹3 revenue per ₹1 spent) | North star | Meta Business Suite<br>GA4 |
| <b>Meta ads CPM</b><br>Cost per 1,000 impressions — India benchmark ₹9–12           | ₹9–15                        | Core       | Meta Business Suite        |
| <b>YouTube watch time</b><br>Avg % of video watched — below 40% = drop-off problem  | 50%+ avg view duration       | Core       | YouTube Studio             |
| <b>YouTube subscriber growth</b><br>Net new subscribers per month                   | 500+ new subscribers / month | Watch      | YouTube Studio             |
| <b>Follower growth rate (IG)</b><br>% growth vs start of month — not raw count      | +8% month-on-month           | Watch      | Meta Business Suite        |

How to track: Meta Business Suite → Insights tab (check 2×/week). Focus on saves and shares over likes — those are the real quality signals. YouTube Studio → Analytics → Audience retention graph per video (check after 48 hrs). Meta Ads Manager → Campaign level ROAS (daily check). GA4 → Acquisition → Social → filter by Instagram/YouTube to measure actual conversions, not just clicks.

## Channel 4 — Email marketing

### Klaviyo email flows + newsletter

Subscriber acquisition, retention, and highest-ROI conversion channel

| KPI                                                                                                     | TARGET BENCHMARK             | PRIORITY   | TRACKED WITH   |
|---------------------------------------------------------------------------------------------------------|------------------------------|------------|----------------|
| <b>Email-attributed revenue</b><br>Revenue directly attributed to email campaigns + flows               | 25–35% of total D2C revenue  | North star | Klaviyo<br>GA4 |
| <b>Newsletter open rate</b><br>Unique opens ÷ delivered — use CTOR as backup (Apple MPP inflates opens) | 38–42% open · 3–5% CTR       | Core       | Klaviyo        |
| <b>Welcome sequence conversion</b><br>% of welcome series recipients who make first purchase            | 8–12% conversion rate        | North star | Klaviyo        |
| <b>Abandoned cart recovery rate</b><br>% of abandoned carts recovered via email flow                    | 8–12% recovery               | North star | Klaviyo        |
| <b>Click-to-open rate (CTOR)</b><br>Clicks ÷ opens — true measure of content quality                    | 15–20% (industry avg 10–12%) | Core       | Klaviyo        |

|                                                                                                    |                       |       |         |
|----------------------------------------------------------------------------------------------------|-----------------------|-------|---------|
| <b>List growth rate</b><br>Net new subscribers per month (new minus unsubscribes)                  | 500+ net new / month  | Core  | Klaviyo |
| <b>Unsubscribe rate</b><br>% of recipients who unsubscribe per send — health signal                | <0.3% per email       | Core  | Klaviyo |
| <b>Deliverability rate</b><br>% of emails that reach inbox (not spam / bounced)                    | 95%+ inbox placement  | Core  | Klaviyo |
| <b>Revenue per email sent (RPE)</b><br>Total email revenue ÷ total emails sent — efficiency metric | ₹15–30 per email sent | Watch | Klaviyo |

**How to track:** Klaviyo Analytics → Flows dashboard (check abandoned cart and welcome sequence weekly for conversion rate). Klaviyo → Campaigns → post-send report 48hrs after each newsletter. Monitor deliverability monthly via Klaviyo's deliverability tab — flag if spam rate exceeds 0.1%. GA4: create custom channel grouping for email source/medium to see email-driven purchases separately from other channels.

## Channel 5 — Content marketing / blogging

| <div>  <b>Blog + content SEO</b><br/> Organic discovery funnel, subscriber acquisition, and brand authority </div> |                                        |            |                       |

| KPI                                                                                                                                                                                                  | 30-DAY TARGET                          | PRIORITY   | TRACKED WITH          |
| <b>Blog organic sessions</b><br>Unique visitors arriving at blog pages from search                                                                                                                   | 2,000+ sessions / month (from zero)    | North star | GA4<br>Search Console |
| <b>Blog-to-email conversion rate</b><br>% of blog visitors who sign up via CTA / quiz                                                                                                                | 2–3% of blog visitors → email          | North star | GA4<br>Klaviyo        |
| <b>Articles published</b><br>Total articles live and indexed by Google                                                                                                                               | 12 articles in 30 days                 | Core       | Notion calendar       |
| <b>Avg time on page</b><br>Mean time readers spend on a blog article                                                                                                                                 | 3+ minutes (signals depth and quality) | Core       | GA4                   |
| <b>Scroll depth</b><br>% of readers who reach 75%+ of an article                                                                                                                                     | 50%+ sessions reaching 75% scroll      | Core       | GA4                   |

**Blog-to-product page CTR**  
% of blog readers who click through to a product / subscription page

5-8% of blog sessions

Core

GA4

**Keywords with impressions in GSC**  
Blog articles generating Google impressions (early ranking signal)

100+ unique keywords with impressions

Watch

Search Console

**How to track:** GA4 → Pages and screens → filter by /blog/ → time on page + scroll depth (add scroll depth event via GTM). GSC → Pages → filter blog URLs → impressions and clicks per article. Set up GA4 goal: "Clicked subscribe CTA from blog" as a conversion event. Monthly: Ahrefs → Site Explorer → Top pages → filter blog → check which articles are gaining rankings fastest.

## Full tracking tools stack

### Google Analytics 4

Cross-channel attribution · conversion tracking · organic vs paid breakdown · user journey analysis · goal completions (purchase, subscription, quiz)

### Google Search Console

Keyword impressions + clicks · avg position · CTR per page · Core Web Vitals · index coverage · mobile usability alerts

### Google Tag Manager

Deploy all tracking pixels without developer help · scroll depth events · CTA click tracking · conversion tag management in one place

### Ahrefs/Ubbersuggest

Keyword rank tracking (weekly) · backlink monitoring · competitor gap analysis · content opportunities · Domain Rating growth tracking

### Google Ads Manager

Campaign ROAS · CPC · Quality Score · impression share · search term reports · automated alert rules for budget spikes

### Meta Business Suite

Reel reach · saves · story CTR · UGC mentions · paid ad ROAS · Meta Pixel for website conversion tracking · audience insights

### YouTube Studio

Watch time percentage · audience retention graphs per video · subscriber growth · click-through rate on thumbnails · traffic sources

### Klaviyo Analytics

Email revenue attribution · flow conversion rates · open rate · CTOR · list health · A/B test results · abandoned cart recovery rate

### 3-month KPI summary at a glance
